

‘Mercury’ Banner

1000mm wide

This template is set up at quarter size.

The final visible area when we enlarge from this document is:

1000mm wide x 2054mm deep, plus 200mm at the bottom which is retained within the base of the unit.

When placing images please ensure they are cmyk and at least 400dpi when placed at 100% within this document.

If you are using a PC when designing your artwork please make sure all text is set as outline and placed as an eps file.

We do not accept Correll Draw eps files.

We are a Mac based company and accept most Mac based files including:

Quark, Illustrator, Freehand, Indesign or print ready pdf's made from one of these Mac files.

If you should have any problems please ring and ask for Rob on 01202 545121.

Do not place any text below this line as this will be the 200mm which is retained within the base unit.

You can however let the background colour or image bleed into it.
